7. Supporting Documents Attach to Application

- EPBB/PBI Incentive Calculator Report(s)
- (2) Copies of Interconnection Agreement
- Signed copy of the purchase/lease agreement
- Site Diagram
- Single Line Diagram or Generic PV System Electric Diagram
- Shading Analysis Report
- Data sheets for inverter and panel
- Free Home Energy Audit Survey or a Business Energy Audit

8. Declaration Under Penalty of Perjury

The undersigned declare under penalty of perjury that:

1. Information provided in this form is true and correct to the best of my knowledge;
2. Above-described solar PV generating system will be solely owned or leased by the Customer and is intended to offset part or all of the customer's electrical needs at the site of the installation;
3. Customer has read and understands the Glendale Solar Solutions program requirements;
4. Customer agrees to comply with all provisions of GWP's Net Metering and Interconnection Agreement;
5. The reservation is non-transferrable to another project and the photovoltaic generating system will be installed at the premise and sold or leased to the customer listed above; and
6. Customer has received a copy of this completed form.

Instructions for Completing Solar Solutions Application

Section 1. Customer Information

Provide the customer name, complete service address of installation, telephone, fax number, email address, and GWP electric account.

Section 2. Contractor/Installer Information

Check the appropriate box for whether the system is to be installed by a contractor or self-installed. If installed by a contractor, provide the contractor's license class, number, expiration date, company name, address, and contact information. If self-installed, electricians assistance is recommended. Electrician is required to have State Contractor License and City Business License. For additional permit information please contact Building and Safety Department at (818) 548-3200.

Section 3. System Information

Check appropriate box applying to system being installed.

Section 4. Solar Photovoltaic System Equipment

Provide the name of inverter and PV module manufacturer, model, quantity, power rating watts, and efficiency. Include the type of PV Array (Fixed, Single-Axis, Dual-Axis), Azimuth or orientation, Tilt angle, and Estimated Annual kWh output. Eligible inverters and rating information is located on the California Energy Commission's website at www.consumerenergycenter.org/erprebate.

Section 5. Incentive Category

Select the appropriate Incentive Category that identifies your solar project.

EPBB Incentive Calculation:

CSI Rating (kW-AC) x Incentive Rate = Total Estimated Incentive

PBI Incentive Calculation:

Estimated Annual Output (kWh) x Incentive Rate x 5 (# Payments)=Total Estimated Incentive

Section 6. Incentive Requested

Provide the system's total installed cost (before GWP Solar Solutions program incentive). Total Request is based on the GWP's incentive level at the time that application is received.

Section 7. Required Supporting Materials

- * Complete and print a copy of EPBB Calculator report found at www.csi-epbb.com. If you cannot input customer zip code, please input 91206. For utility please scroll and select SCE.
- * Visit GWP website at www.GlendaleWaterAndPower.com to find interconnection agreement.
- * For shading analysis report you may also provide a disclosure statement indentifying existing trees on the property, which in the future may cast potential shade that would reduce system performance.
- * Customer must have a Free Home Energy Audit Survey or a Business Energy Audit completed before installation. For the Smart Home Energy Audit, please call: (818) 265-5062.
For Business, please call Shant Boodanian (818) 548-2747 or Herbert Garcia (818) 548-2749

Section 8. Declaration Under Penalty of Perjury

Form must be signed by customer and installer under penalty of perjury or it will be rejected.
